The Official Monetary and Financial Institutions Forum is an independent think tank for central banking, economic policy and public investment – a non-lobbying network for best practice in public-private sector exchanges globally.

With offices in London and Singapore, OMFIF focuses on worldwide policy and investment themes, particularly in asset management, capital markets and financial supervision and regulation. At its heart are Global Public Investors – central banks, sovereign funds and public pension funds – with investable assets of $33.8tn, equivalent to 45% of world GDP.

OMFIF promotes higher standards, performance-enhancing exchanges between public and private sector institutions, and a better understanding of the world economy in an atmosphere of mutual trust.

Membership offers insight through two complementary channels – Meetings and Analysis – where members play a prominent role in shaping the agenda. OMFIF Meetings take place within central banks and other official institutions and are held under OMFIF Rules. OMFIF Analysis includes research and commentary. Among the contributors are in-house experts, Advisers Network members, and representatives of member institutions and academic and official bodies.
