OMFIF Global Public Investor virtual launch
OMFIF is producing the seventh annual *Global Public Investor* report devoted to public sector asset ownership and management across a range of official institutions around the world. Global public investors encompass three different types of institutions, central banks, sovereign funds and public pension funds, linked by their status as public sector-funded entities and representing a core component of world capital markets, with total holdings estimated at $39.5tn. The aim of the launch is to present the findings and review the issues covered in the publication, including the comprehensive ranking of the world’s 750 largest public investors based on assets under management.
