OMFIF Digital Monetary Institute

Prospectus 2026

Shaping the future of money

Industry innovation, confidential dialogue, policy relevance

Every year, the landscape of finance changes more rapidly than before. New technologies are creating innovative areas of business and potentially cutting the ground from beneath established market infrastructures. Policy-makers have vital questions to answer, weighing their duty to preserve financial stability against the risk of stifling progress and the benefits it can bring.

OMFIF's Digital Monetary Institute is the leading convener of the public and private sectors on the future of money, payments and financial markets. We provide a trusted platform for our global community of central banks, regulators, payments service providers, financial services and technology providers to explore the risks and opportunities of the new digital economy.

DMI OMFIF Digital Monetary Institute

Why DMI matters in 2026

Such rapid changes in technology and finance inevitably create uncertainty and risks, particularly when it comes to regulation and governance. It is more important than ever to gather decision-makers in the same room to discuss issues, compare notes and find solutions to the problems facing the economy.

Questions around stablecoins, tokenisation, central bank digital currencies, distributed ledger technology, instant payment systems, cloud and artificial intelligence will shape the future of digital money. OMFIF provides a space in which those with the power to find the answers can speak confidentially and assuredly.

What members gain in practice

- Off the record discussions with senior decision makers
- A space to test assumptions confidentially with peers facing similar constraints
- Access to institutional knowledge sharing, data and intelligence
- The chance to engage directly with central banks, policy-makers and regulators shaping global policy

DMI at a glance

The DMI has a truly global reach, with 114 countries represented across its network, including over 100 central banks represented.

DMI activities consist of:

- The annual Digital money summit, convening industry experts and market-leaders for a two-day gathering in May
- Member roundtables, both in-person and virtual
- Blockchain working groups and bespoke research reports

DMI Journals, commentaries and podcasts, presenting analysis and thought leadership

Core areas of focus

The DMI's work covers five key themes:

- Evolution of central bank and commercial bank money
- Tokenisation and reimagining financial markets
- The regulation of cryptoassets and stablecoins
- Cross-border payments and instant payments
- Artificial intelligence, cloud and digital infrastructure for financial services

These themes reflect the evolving priorities of central bankers, regulators, traditional financial service providers and tech developers navigating a rapidly changing world.

Plans for 2026

In 2026, DMI will expand its engagement with central banks, regulators, commercial banks, fintechs and payments service providers, with a focus on senior-level dialogue and regional coordination.

Programme highlights

- 25 member roundtables, with at least half held in person (in London, Washington DC, and New York)
- Digital money summit 2026 in London
- Future of payments forum 2026 in Frankfurt
- Global report launches for two blockchain-focused working groups
- Convening at the International Monetary Fund-World Bank annual meetings, bringing together policy-makers, regulators and technology providers

Who participates

DMI convenes policy-makers, innovators and regulators responsible for shaping the future of digital money. Participation spans advanced and emerging economies, enabling members to benchmark policy approaches and investment thinking across jurisdictions.

Confirmed contributors include central bank governors, finance ministry officials, regulators and senior economists from institutions such as:

- Global central banks and commercial banks
- Technology providers, fintechs and stablecoin issuers
- Market regulators and competition authorities

Evidence of impact

DMI's convening and research activity in 2025 included:

- 30 events across major financial centres
- 2,050+ registrations from policy-makers and institutional investors
- Engagement with representatives from 29 central banks at the IMF–World Bank annual meetings

DMI research and commentary reached over 75,000 readers and listeners across reports, articles and podcasts
