Prospectus 2026

Driving transition in finance

SPI OMFIF Sustainable Policy Institute

Open dialogue, industry action, policy solutions

The global transition finance landscape is entering a more uncertain and complicated phase. Shifts in priorities and policy pullbacks have been witnessed across the globe, and action on climate change is at risk of taking a backseat.

OMFIF's Sustainable Policy Institute was founded to meet the challenges of creating a sustainable financial system. It brings together central bankers, pension and sovereign funds, regulators, government officials, asset managers, investors and banks to drive the sustainability agenda, deepen understanding of the challenges and enable peer-to-peer exchange.

OMFIF Sustainable Policy Institute

Why SPI matters in 2026

With the planet on track to exceed 1.5 degrees Celsius of global warming compared to pre-industrial levels by 2030, there has never been a more important or urgent time to focus on the sustainable transition. Climate change has economic, political, environmental and social implications for policy-makers and corporates alike.

In this environment, timely and confidential dialogue has become essential. Understanding how peers and policy-makers are reassessing transition risk, investment strategy and the need to adapt to a new world – before positions are fully reflected in markets or policy statements – is a source of strategic advantage.

SPI supports members by combining senior-level convening, research and industry expertise across regions and institutions.

What members gain in practice:

- Off-the-record discussions with senior decision-makers
- A space to test assumptions confidentially with peers facing similar constraints
- Access to industry surveys, data and intelligence
- The chance to engage directly with central banks, finance ministries and regulators shaping approaches to transition globally

SPI OMFIF Sustainable Policy Institute

SPI at a glance

With a vast network of both public and private sector industry leaders, SPI's activities consist of:

- Member roundtables, both in-person and virtual
- Global gatherings of policy-makers and investors in transition finance hubs
- Market-leading research and analysis

Core areas of focus:

SPI's work is structured around four themes:

- Transition finance
- Standards, regulation and policy
- Data, technology and innovation
- Gender balance in the financial industry

These themes reflect the environmental and social priorities of policy-makers and regulators in the transition to a more sustainable global economy.

Market-leading research and dialogue

The Transition finance workstream is SPI's main research programme. It underpins OMFIF's engagement with central banks, public investors, regulators and corporates navigating issues related to climate change and sustainable finance. The programme features:

- The Transition Finance Working Group, featuring private bilateral conversations with public pension and sovereign funds
- Transition finance summits, convening policy-makers and industry leaders in centres of sustainability such as Singapore and Mexico
- Journals featuring thought leadership from experts and market-makers

Members benefit from:

- Access to 13 years of data analysis on gender balance
- Participation in exclusive working groups with public investors
- Confidential insights into how institutions are navigating the sustainable transition

SPI membership is global, institutional and tailored to members' priorities.

Plans for 2026

In 2026, SPI will expand its engagement with policy-makers, regulators and investors, with a focus on senior-level dialogue and cross-regional co-operation.

Programme highlights

- 20 member roundtables, both in person and virtual
- Global gatherings of industry leaders, including the Americas transition finance summit 2026 in Mexico City
- Presenting the findings of the Gender Balance Index 2026 report
- Direct engagement with policy-makers at New York Climate Week
- Convening at the International Monetary Fund-World Bank annual meetings

Who participates

SPI convenes decision-makers responsible for transition strategy, asset allocation, financial stability, public investment and market regulation. Participation spans advanced and emerging economies, enabling members to benchmark policy approaches and investment thinking across jurisdictions.

Confirmed contributors include governors, ministers, regulators and senior economists from institutions such as:

- Central banks, pension funds and sovereign funds
- Ratings agencies, multilateral development banks and academics
- Ministries of finance, market regulators and standard-setting bodies

SPI OMFIF Sustainable Policy Institute

Evidence of impact

SPI's convening and research activity in 2025 included:

- 17 events across major financial centres
- 1,100+ registrations from policy-makers and institutional investors
- Engagement with central banks, pension funds and multilateral development banks at New York Climate Week and the IMF-World Bank annual meetings
- Global gender benchmark research covering more than 300 institutions and 6,000+ datapoints

SPI research and commentary reached more than 130,000 readers and listeners across reports, articles and podcasts.
